WASHINGTON, Oct. 5, 2022 /PRNewswire/ -- Danaher Corporation (NYSE: DHR) (the "Company"), the global science and technology innovator, today published its 2022 Sustainability Report which highlights the progress of the Company's sustainability program. Danaher also announced it has set a new goal to reduce its absolute Scope 1 and 2 greenhouse gas (GHG) emissions by 50.4% by 2032, compared to a baseline year of 2021—aligning to the prevailing climate science goal of limiting global warming to 1.5 degrees Celsius above pre-industrial levels.

"Every day across Danaher, we work to positively impact the world around us in meaningful ways," said Rainer Blair, President and Chief Executive Officer. "We feel a strong sense of responsibility to exceed the expectations of our stakeholders across the many facets of sustainability, and within this challenge we see tremendous opportunity to help all our stakeholders Realize Life's Potential. Thanks to the driving force of the Danaher Business System, we have made notable progress across our sustainability endeavors this year and are excited to set our future ambitions even higher."

This year's report conveys the depth and scope of Danaher's commitment to sustainability and details several important milestones the Company achieved across its three sustainability strategic pillars during the past year:

**Innovating Products That Improve Lives and Our Planet**

*Investing in our innovation ecosystem*

- Danaher hired approximately 4,000 new research and development (R&D) associates and invested $1.7 billion in R&D in 2021—up nearly 30% year-over-year.
- Danaher continued building out its science & technology ecosystem, adding several globally recognized physician scientists to serve as chief science and/or technology officers across the organization.
- Armed with the DBS Innovation Engine, Danaher launched several breakthrough technologies and solutions across scientific disciplines and end market applications.

**Building the Best Team**

*Expanded commitment to diversity and inclusion (D+I)*

- The Company adopted the Danaher DEI Policy which details its commitment to diversity and inclusion at all levels of the organization.
- In 2021, over 40% of Danaher's nearly 20,000 global new hires were women and nearly 75% of U.S. new hires were diverse (women and/or people of color).
- Danaher maintained pay equity across gender and racial/ethnic groups in the U.S. in 2021 and expanded the scope of this analysis to now include short-term incentive compensation in addition to base pay.

**Protecting Our Environment**
Established ambitious new GHG emission reduction target

- Danaher announced a new 2032 goal to reduce its absolute Scope 1 and 2 GHG emissions by 50.4% compared to 2021 levels.
- This new goal builds upon a more than 29% reduction in Danaher's Scope 1 and 2 GHG emissions (normalized to revenue) from 2019 to 2021, which substantially exceeded the Company's original five-year reduction target of 15%.
- Building on existing DBS tools dedicated to reducing energy and minimizing waste, the team is further leveraging the power of DBS to develop and pilot a Water Stewardship Toolkit to help Danaher facilities around the world optimize water use.

"As global stewards of the environment, we recognize an increasingly urgent need to take swift action to address climate change. The progress we achieved against our original GHG emissions target gives us confidence as we embrace a bold new goal, and we expect that our powerful suite of DBS tools and processes will be a key driver of future reductions," Mr. Blair concluded. "We know that when we bring together the scope and scale of our innovations, the passion and dedication of our team, and our deeply ingrained commitment to continuous improvement, the potential for long-term positive impact is limitless."
